

MHT System Interventions

Observe the management style of the existing organization evaluating the impact of their efforts on the overall goal.

The Mercy Model

Frame the relationships of the various agencies as integral for a successful effort

The Mercy Model

Guide all partners into a long term view of future capacity in terms of their current assets. Develop a vision that is community-focused and wellness-based as part of a coordinated health system

The Mercy Model

Refocus from long term vision into immediate needs. Guide all partners to accept that immediate solutions must be designed to “plug and play” with the long term vision and larger system.

The Mercy Model

Guide the leaders to practice coordination, cooperation, and communication as essential to reaching their common goal. Encourage coordinated efforts not unilateral efforts.

The Mercy Model

Promise **ONLY** what can be
delivered
